

The background is a vibrant collage of science-related illustrations. It includes a purple alien-like character, a rack of test tubes with colored liquids, a beaker on a stand, a microscope, a person wearing safety goggles, a snail, a lightning bolt in a red circle, a pair of yellow gloves, a dinosaur, a robot, a worm, and various mathematical formulas like $E=mc^2$, $a^2 - (a+b)(a-b)$, $I = \frac{U}{R}$, and $R = \frac{U}{I}$. The word 'Science' is written in large, bold, grey letters in the center.

What is Science?

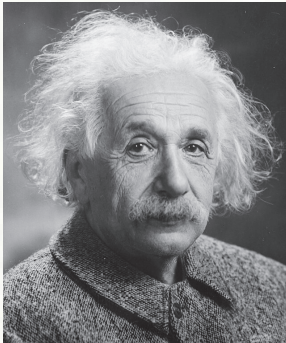

Science is the study of the natural and social world, using evidence and a methodology to build and organize knowledge. Science is involved in everything we do, from walking or running in the playground, to heating the house.

There are five major branches of science: Chemistry, Astronomy, Earth Sciences, Physics & Biology.

Below are 3 Scientists- can you name them?

Louis Pasteur

Albert Einstein

Isaac Newton
